VOLTAGE CONVERTERS POWER SUPPLIES BATTERY CHARGERS LOW VOLTAGE DISCONNECTS USB CHARGERS WIRELESS CHARGERS

### www.alfatronix.com

### INTRODUCTION

Welcome to our latest Alfatronix Catalogue featuring all products in the portfolio. Here you will be able to find all of the information you need with regard to DC-DC converters, mains and desktop power supplies, PowerTector LVD battery protectors and DC-DC battery chargers, as well as our extensive range of USB chargers.

This year's catalogue includes a new range of wireless chargers. For vehicle installations, we have the new podsole, wireless and USB charging console which is totally versatile and can be installed onto any seatback, a fully integrated module which can be installed into passenger seating, and a surface module which can be installed tops and media benches to provide unobtrusive, yet stylish wireless charging for passengers. In addition is a new mains powered, surface integrated wireless charger module for installation into furniture. Its robustness makes it perfect for use in publicly accessible spaces. Alongside our USB chargers this completes our range to offer charging for all mobile devices.

Our DC-DC range is more extensive than ever and now offers converters from 36W to 600W and includes 24V-12V and 12V-24V configurations as well as an improved range of 12V-12V and 24V-24V stabilisers.

In addition to our brick in the lead mains power supplies, our desktop range continues to be very popular and new radio configurations are added regularly, so please check for up to date information. Today, all popular radio transceivers are covered by the Alfatronix Desktop or "wedge," range, as they have become popularly known in the market.

All products are manufactured at our factories in Poole, England and are available for fast despatch, usually within a day or two. We have distributors throughout Europe and beyond for fast delivery within your local area and our expert engineering team is always available to assist with any issues relating to application or installation. Here at Alfatronix, we make every effort to maintain the very highest of quality standards backed by a return to base guarantee.

Whether you are involved in the communications, automotive or marine markets, specifying original fit components at OEM level, or you require power conversion as part of a system integration, we have a wide range of products to suit your needs.

Denotes non-isolated common earth products.

Denotes isolated products. These provide isolation between input and output and are often used for marine applications or for petrochemical applications to prevent sparking. They can also help to reduce the effects of EMC interference. They can always be used in place of non-isolated products but not vice versa.

All of these products are also available in IP65 versions. Please add the suffix -RU to the part number when ordering.

Many products have an intermittent current rating, so occasional short periods above the continuous ratings are permissible. Intermittent ratings are normally 25% above the continuous ratings, though often greater on smaller units. Permissible max usage cycle is 2 minutes, followed by 8 minutes rest.

In addition to the standard products tabled, a number of wide input converters are also available. These are configured to operate from both 12V and 24V systems. *Please contact us for more information.* 

Output voltages are generally set to typify normal battery output voltages as follows: 12V nominal = 13.6V, 24V nominal = 27.2V, 48V nominal = 54.4V.

Most products are available with alternative output voltage options at extra cost, for example 12V instead of 13.6V.

Whilst most products are IP53 as standard, many others are also available as IP65 versions. Part numbers will have **-RU** suffix. *Please see data sheet for clarification.* 

# **POWERVERTER** 24VDC TO 12VDC VOLTAGE CONVERTERS

### 24VDC TO 12VDC VOLTAGE CONVERTERS

These products offer a convenient way to operate mass produced 12Vdc equipment such as cell phones, in car entertainment, professional communications, telematics equipment, refrigerators, televisions etc. from the 24Vdc mobile electrical systems found on diesel engined vehicles and vessels.

### A COMPREHENSIVE RANGE

There are 14 products in the range from 3A to 50A in isolated or common earth configurations. They have been optimised for high volume 24Vdc to 12Vdc applications such as on heavy goods vehicles, coaches, buses, forestry and agricultural vehicles, as well as commercial and leisure marine vehicles.

### TAMPER PROOF

These units are IP53, so there are no ventilation holes to permit stray objects, dust or water droplets to enter the case, there are no external fuses to be tampered with. Fuses will only blow if there is a fault so there is no need to make them accessible.

### **PRODUCT VARIANTS**

Many PowerVerters and DD Series products can be configured with alternative output voltages etc. for specialist applications. *Please call our sales team to discuss your requirements.* 

### FAST INSTALLATION

All the units consume an off load current of less than 15mA, which is probably less than the self discharge current of the vehicle's battery. In most cases this can be ignored, speeding the installation by removing the need to fit a remote switch.

All products fit onto a "Click 'n' Fit" mounting clip which is fixed in three points allowing it to be mounted on uneven surfaces. It is easy to fit the clip into awkward places and then simply click the unit into position. A fixing kit for din rail installation is also available.

A green LED indicates when there is output from the converter. This gives reassurance to the installation engineer and speeds fault finding.

# CHOOSE YOUR POWERVERTER PRODUCT

Part Number	Cont/Int Current	Nominal Voltage	Power Rating	Dimensions	Weight
PV3s	3A/6A non-isolated	24Vdc input, 12Vdc output	36W	67 x 87 x 50mm	200g

PV24i	24A/30A isolated	24Vdc input, 12Vdc output	288W	217 x 87 x 50mm	785g

rner input and output voltage configurations are available as special orders, please ask our sales tea For Railway Approved Versions, please see PowerVerter Railway Converters.

# TECHNICAL DATA

Input voltage range	17-32Vdc
Output voltage	13.6Vdc +15% -20% at extremes of temperature, load, input tolerance, etc.
Intermittent output power	As stated, taken for a maximum of 2 minutes followed by 8 minutes rest
Transient voltage protection	Meets ISO7637-2 International standard for 24Vdc commercial vehicles
Electrostatic voltage protection	Meets ISO10605, ISO14982, >8kV contact, 15kV discharge
Output noise	<50mV pk-pk at continuous load. Meets CISPR25.
Off load current (quiescent current)	<15mA
Power conversion efficiency	Typically: 90% for non-isolated units, 85% for isolated units, *95%
Isolation	>400Vrms between input , output and case, on isolated products only
Operating temperature	-25°C to +30°C to meet this specification table
	+30°C to +80°C de-rate linearly to 0A
Storage temperature	-25°C to +100°C
Operating humidity	95% max., non-condensing
Casework	Anodised aluminium, glass filled polycarbonate, dust water and impact resistance to IP533
Connections	Four 6.3mm push-on flat blade connectors *(5 way Phoenix connector including enable on/off
	terminal and mating half)
Output indicator	Green LED adjacent to output terminals
Mounting method	Click 'n' fit mounting clip, fitted separately using three hole fixture, * 4 hole cradle
Safe area protection: Over current	Limited by current sensing circuit
Over heat	Limited by temperature sensing circuit
Transients	Protected by filters and rugged component selection
Catastrophic protection	Protected by internal input and output fuses
Approvals	2014/30/EU The general EMC directive
	Regulation 10 The automotive directive
	93/68/EEC The CE marking directive
Designed to	EN50498, ISO 7637-2, ISO 11452-2, ISO 14982, EN60945, EN55032 & FCC15B.
Markings	CE, UKCA and E (automotive) marked

# O POWERVERTER DUAL OUTPUT 24VDC TO 12VDC CONVERTERS

# PV-A RANGE DUAL OUTPUT CONVERTERS WITH SWITCHED OUTPUT

Some automotive equipment, such as In Car Entertainment (ICE) usually has two links to the vehicle's electrical system, one for memory back-up and one for switching the equipment on and off.

The on/off function is controlled from the ignition switch so that when the ignition key is removed, the ICE equipment is turned off, preventing the battery from becoming discharged whilst leaving the memory back-up circuit still active.

Also, some truck manufacturers run other 12V equipment, such as a cigar lighter socket from the same feed, while others prefer to leave it permanently on.

The PV12s-A is ideal for powering in car entertainment systems where a permanent memory circuit is required for security purposes.

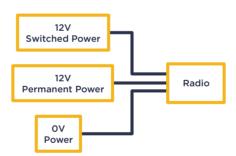

The PV3s-A is ideal for smaller applications where a switched and permanent circuit are both required.

Alfatronix have developed three voltage converters, a 3Amp, 6Amp (continuous) and a 12A (continuous), which overcome these configuration problems. The Alfatronix converters mimic the 12V battery and 12V ignition function by providing two outputs, either of which can provide full power. One output is available whenever the 24V battery is connected. The other output is switched by the 24V ignition switch. Now the ICE equipment can be fitted to the 24V truck as simply as fitting it to a 12V car.

Of course, the Dual Output Range can be used for any application where a dual output is required or where a switched and permanent or memory connection must be retained.

### **TYPICAL APPLICATIONS**

### CONNECTION SOLUTIONS

PV12s-A Connections			
Pin No.	Colour	Description

# **DD SERIES & DDI SERIES** VOLTAGE CONVERTERS

### 12V-12V, 24V-24V & 48V-12V CONVERTERS FOR A WIDE RANGE OF APPLICATIONS

The sensitivities of modern electronic equipment to variable input voltages, susceptibility to EMC interference and in some cases, the need to isolate the supply has made voltage stabilisation an important section of our product range. Start/Stop technology on motor vehicles has added to this problem. The DDi Series offers a wide range of 12V-12V and 24V-24V isolated products that ensure a stable and reliable voltage can be delivered to important equipment. Units are available from 36-240W. The range now also offers 48V-12V units, suitable for the telecoms and forklift truck markets. *For 12V-24V converters, see DD Series 'Up' Voltage Converters* 

#### A COMPREHENSIVE PRODUCT RANGE

There are four products in the 12V-12V isolator range from 36W to 168W and a further five products in the 24V-24V range from 36W to 240W. There are also three 48V-12V products from 36W to 108W. All products use modern switchmode designs and are built using the same concepts and technologies as the successful PowerVerter range, which will of course meet your 24V-12V requirements.

### FAST INSTALLATION

All the units consume an off load current of less than 15mA, which is probably less than the self discharge current of the vehicle's battery.

All the products fit onto a "Click 'n' fit" mounting clip which is fixed in three points allowing it to be mounted onto uneven surfaces. It is easy to fit the clip into awkward places, then simply click the unit into position.

The green LED indicates when there is output from the converter. This gives reassurance to the installation engineer and speeds fault finding.

### PRODUCT CODING

The product code is developed as follows, taking the DDi 12-12 036 as an example:

DDi24-24 072

Calfatronix

DD	DC input and output			
i	Denotes isolated converter			
12-12 Nominal 12V input /output				
036	36W capacity unit			

12V-12V and 24V-24V units can provide a stable output voltage as well as providing galvanic isolation for a variety of applications

i24-24 108

fatroniz

# 12V-24V "UP" CONVERTERS FOR A WIDE RANGE OF APPLICATIONS

If you need to fit 24V equipment onto a 12V electrical system, then an "up" converter from the DD Series offers a fast and easy way to configure your system. Now with a range from 72W (3A output) to 600W (25A output), these products offer state of the art designs for fast installation and long term reliable operation. Typical applications include the installation of 24V equipment on 12V vehicles and installation of specialist equipment requiring higher operating voltages.

### 400W AND 600W 12-24V UNITS

The latest addition to the range includes two high current (17 and 25 Amps output) units. These use state of the art designs with efficiency up to 93% and practically all components are mounted using computer controlled surface mount technology (SMT). The result is a robust product with low component mass. The mechanical aspects include a brand new casing profile designed for maximum heat dissipation as well as a new design of our highly successful mounting cradle that allows the unit to be fully wired before being "clicked" into place. This provides for a faster installation time with mechanics capable of withstanding long term vibration with no risk of screws falling out.

### **CASING FORMATS**

12V-24V converters are available in two casing formats. Units from 72-240W use the standard Alfatronix aluminium casings with polycarbonate end-caps and three point mounting cradle. The larger 400W and 600W units occupy a larger heat-sink casing and utilise the heavy duty Phoenix connector. Installation is by way of the larger four point 'l' shaped mounting cradle.

### ALSO AVAILABLE IN IP65 FORMAT

The DD Series 12-24V products are available in either standard IP53 format (like most Alfatronix converters) or the ruggedised IP65 versions. Just add -RU to the part number. These are suitable where the installation is in a particularly hostile environment and subject to increased water and dirt exposure.

### **PRODUCT CODING**

The product code is derived as follows, taking the DD 12-24 072-RU as an example:

DD	DC input and output
12-24	Denotes 12V input , 24V output
072	Denotes wattage
-RU	Denotes IP65 version

# CHOOSE YOUR DD SERIES PRODUCT

# TECHNICAL DATA

Input voltage range	12Vdc +/- 30%
Output voltage	27.2Vdc +/-5% at extremes of temperature, load, input tolerance etc
Continuous current rating	3A - 25A depending on model
Intermittent rating	Continuous rating +20%, taken for a maximum of 2 minutes followed by 8 minutes rest
Transient voltage protection	Meets ISO7637-2 International standard for 12V and 24Vdc commercial vehicles
Electrostatic voltage protection	Meets ISO10605
Output noise	<100mV pk-pk at continuous load
Off load current (quiescent current)	<20mA (400W and 600W enable off), less than 100mA (72 - 240W units)
Power conversion efficiency	Typically 93%
Operating temperature	-25°C to +30°C to meet this specification table +30°C to +80°C de rate linearly to 0A
Storage temperature	-25°C to +70°C
Operating humidity	95% max., non-condensing
Casework	Anodised aluminium, glass-filled polycarbonate, dust, water and impact resistance to IP53. Ruggedised versions also available to IP65.
Connections	Four 6.3mm push on flat blade connectors (72W - 240W) Five terminal connector with screw tightening with mating half supplied (400W and 600W units)
Output indicator	Green LED adjacent to output terminals
Mounting method	"Click 'n' fit" mounting clip, fitted separately using 3 hole fixing (4 hole on 400W and 600W)
Safe area protection: Over current Over heat Transients Input /Output over voltage protection Catastrophic failure	Limited by current sensing circuit Limited by temperature sensing circuit Protected by filters and rugged component selection Controlled by internal circuitry Protected by internal input and output fuses
Approvals	2014/30/EU The general EMC directive Regulation 10 The automotive directive 93/68/EEC The CE marking directive
Designed to	EN50498, ISO 7637-2
Markings	CE, UKCA and E (automotive) marked

### AL1 SERIES WIRELESS CHARGER MODULE FOR INTEGRATION INTO VEHICLE EQUIPMENT

Wireless charging is increasingly becoming the preferred method of maintaining battery power in mobile devices, with most of the latest designs from the major manufacturers including wireless charging as standard.

The AL1 series wireless charger module is designed for integration into equipment on vehicles to allow this facility to extend to private and public transport applications. This module is typically housed in apparatus that enables mobile phones to be retained in position on the vehicle during charging. Typical applications include integration into seat back consoles and table tops.

The charging element is placed within 0.7mm of the casing exterior to allow for maximum performance in a wide range of situations. When designing into housing equipment, we recommend keeping the active face of the unit within 5.0mm of the passenger accessible area.

### THE RANGE

The Alfacharge range has been designed to meet the rigorous standards required for on board commercial vehicle applications including EN50498, EN61373, ISO7637-2 and is both CE and E marked (Reg10). The casings are made from VO rated (self extinguishing) high impact polycarbonate and the PCB is populated by computer controlled SMT for maximum accuracy and durability.

or structure over the coil area should not exceed 5.0mm in thickness When placed against a structure, wireless devices such as mobile Cover Max 5.0mm phones with cases less than 3.0mm thick will reliably charge 28.2mm Mobile phones with case backs Alfatronix no greater than wireless 3.0mm will charging charge reliably. module AL1-H. Charging coil centre 32.7mm Π

Most wireless mobile phones will connect within 5.0mm from optimal central point

This is a module unit which must be installed within a further structure. Cover

Designed for integration into passenger vehicles.

Accepts both 12Vdc and 24Vdc.

- Extra vibration protection to FN61373
- Approved to EN50498. ISO7637-2 and EN50155. E marked (Reg10) and CE marked.
- Phone communicates every second to establish correct charge
- Foreign object detection & activation.
- Convenient wide input of 9-32Vdc for wireless charger.
- LED to confirm correct operation.

It is recommended that these units are fused individually with a 1Amp fuse (24V systems) or a 2Amp fuse (12V Systems). Suitable in-line fuses are available.

### WARRANTY

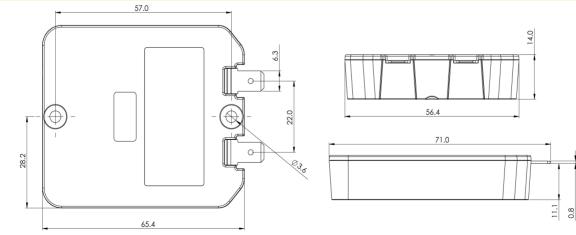

The AL1 Series of wireless chargers are manufactured using rugged components to provide years of services in demanding commercial environments and are covered by a three year return to base warranty.

# ALFACHARGE PART SELECTION

Part Number	Description	Dimensions	Weight
AL1-H	Integrated wireless phone charger with horizontal connectors	65.4 x 56.4 x 14mm	70g

# TECHNICAL DATA

Input voltage range	9-32Vdc
Output power	Nominal 5W
Application	Charging of wireless enabled devices
Transient voltage protection	Meets ISO7637-2 International standard for 12/24V vehicles
Tx-Range	Nominal 8mm
Off load current (quiescent current)	6mA
Power conversion efficiency	50% - 60%
Operating temperature	-25°C to +40°C
Storage temperature	-25°C to +100°C
Operating humidity	95% max., non-condensing
Casework	Black polycarbonate body
Connections	Input: 6.3mm push-in flat blade connectors Output: Wireless transmission <200kHz
Output indicator	Green/blue LED output indication
Mounting method	Box with mounting screw holes - screws provided. Can also be installed by clips or other bespoke method
Safe area protection: Over Current Over heat Overvoltage and Undervoltage Reverse Polarity Transients Catastrophic protection	Limited by current sensing circuit Limited by temperature sensing circuit Limited by sensing circuit Limited by sensing circuit Protected by filters and rugged component selection Internal fuse

### AL2 SERIES WIRELESS CHARGER PODSOLE FOR INTEGRATION INTO VEHICLE EQUIPMENT

Wireless charging is increasingly becoming the preferred method of maintaining battery power in mobile devices, with most of the latest designs from the major manufacturers including wireless charging as standard.

The AL2 series Podsole has been elegantly designed to allow passengers to charge both wireless and USB charging devices on the move. The two retaining clips and non-slip buttons secure the device into place permitting the wireless charging of all wireless enabled smart devices, whilst the USB connector can charge another device like a phone or tablet simultaneously.

The Podsole is extremely versatile and can be connected to both 12Vdc and 24Vdc electrical systems without adjustment. It has also been designed for both OEM and retrofit applications and can be mounted to any seat back using 4 screws which are hidden behind tamperproof covers. Due to the durable polyurethane compound encompassing the electronic components, comprehensive protection is provided against dust and liquid ingress.

The advanced electronic design will detect the charge status of the device and alter the charging process accordingly. This ensures that whatever device is connected, be it Apple, Android, phone or tablet, it will always be charged as fully as time and capacity allow. Two LEDs indicate the chargers are operational.

### THE RANGE

The Alfacharge range has been designed to meet the rigorous standards required for on board commercial vehicle applications including EN50498, EN50155 & ISO7637-2, and is both CE and E marked (Reg10). The casings are made from VO-rated (selfextinguishing) high impact polycarbonate and the PCB is populated by computercontrolled SMT for maximum accuracy and durability.

### WARRANTY

The AL2 Podsole Series of combined wireless chargers and USB Chargers are manufactured using rugged components to provide years of service in demanding commercial environments and are covered by a three year return to base warranty.

Designed for integration into passenger vehicles.

Accepts both 12Vdc and 24Vdc.

- Approved to EN50498, EN50155 & ISO7637-2. E marked (Reg10) and CE marked.
- Phone power communicates every second to establish correct charge.
- Foreign object detection & activation.
- Convenient wide input of 9-32Vdc for wireless and USB charging in one extrusion.
- LED to confirm correct operation.

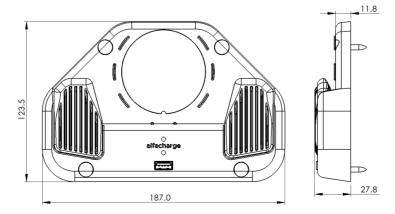

It is recommended that these units are fused individually with a 2Amp fuse (24V systems) or a 3Amp fuse (12V systems).

# PASSENGER ACCESSIBLE WIRELESS CHARGERS FOR VEHICLE INSTALLATIONS

Wireless charging is increasingly becoming the preferred method of maintaining battery power in mobile devices, with most of the latest designs from the major manufacturers including wireless charging as standard.

The AL3-V wireless charger is designed for installation into table tops on vehicles such as buses and coaches to allow passengers the ability to charge their devices on the move. The unit is installed through an 80.0mm hole in the table and secured underneath, providing an unobtrusive and functional enhancement of the passenger experience. These units make a complementary addition to the AL1-H integrated charger modules, and can be installed at the vehicle build stage or as part of a retrofit activity, as required.

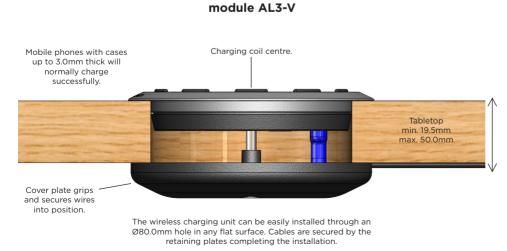

The wireless receiver of the charging unit will automatically detect the presence of suitably enabled mobile devices and will typically charge through a case up to 3.0mm thick.

### THE RANGE

The Alfacharge range has been designed to meet the rigorous standards required for on board commercial vehicle applications including EN50498 and ISO7637-2 and is both CE and E marked (Reg10). The casings are made from VO-rated (self-extinguishing) high impact polycarbonate and the PCB is populated by computer-controlled SMT for maximum accuracy and durability.

Alfatronix wireless charging

Designed for integration into passenger vehicles.

Accepts both 12Vdc and 24Vdc.

- Approved to EN50498 & ISO7637-2. E marked (Reg10) and CE marked.
- Phone communicates every second to establish correct charge.
- Foreign object detection & activation.
- Convenient wide input of 9-32Vdc in one standard casing.
- LED to confirm correct operation.

It is recommended that these units are fused individually with a 1Amp fuse (24V systems) or a 2Amp fuse (12V Systems). Suitable in-line fuses are available.

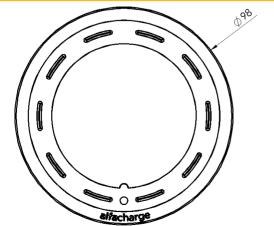

### WARRANTY

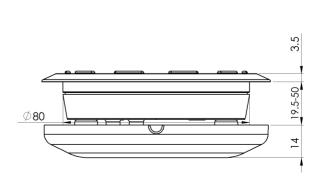

The AL3 Series of wireless chargers are manufactured using rugged components to provide years of service in demanding commercial environments and are covered by a three year return to base warranty.

#### A & C PORT USB CHARGING FOR 12V AND 24VDC APPLICATIONS

The PowerVerter PVPro Range of USB chargers has been completely updated into the A & C Range, amalgamating all the great design concepts of USB charging on vehicles into one simple range. Models are now available offering both USB A and C connections, including Single and Double A as well as Single and Double C and a combined Dual A & C output version.

As well as standard (rear fit), all models are available in front fit versions. This is a popular option for when rear space access is limited, and also allows for quick removal and replacement if required.

Ingress protection is to IP30 as standard. However, the PVPWp versions retain the slimline design and offer enhanced protection to IP65 (not connectors). The ruggedised PV65R versions which are also IP65 (not connectors), offer additional transient protection and are particularly suitable in more demanding environments such as for installation into vehicle walls.

Output power performance has also been enhanced. As well as charging both Apple and Android mobile phones, the USB-C models offer higher current outputs for limited charge assistance on tablets and laptops.

Standard versions require only 20mm (typical) rear space and can easily be installed in bus and coach seat backs, walls and dashboards. A series of 3 pod designs enable retrofit options for underseat, table and wall mounting.

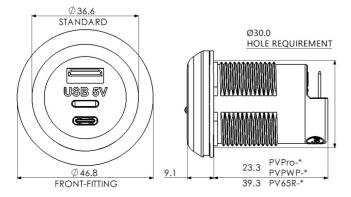

All products are available in front fit options for when rear access is limited

### THE RANGE

All units are installed through a 30mm hole. Standard format units are retained by a rear nut while the front fit versions include a bezel with tamperproof cover ring. Input power is by way of two 6.3mm push-in flat fit automotive terminals.

Dimensionally the USB A and C Chargers are the same and are interchangeable with the ever-popular PVPro Range. Electronically the designs include reverse polarity protection and automatic short circuit protection, so in the event of tampering or compromise the unit will shut down, then restart again, once the fault has been removed.

IP65 versions available PV65R - ruggedised and PVPWp, both IP65 rated; indicated by yellow rear cap

The new A & C range has the following key benefits:

- Both type-A and type-C outputs
- Apple and Android compatible
- Dashboard, slimline seat back or underseat pod configurations
- LED output indicator
- IP30 or IP65 ingress protection -see Product Overview
- CE, E and UKCA marked

PVPro-AA Double output

A connector

PVPro-A Single output A connector

PVPro-C Single output C connector

PVPro-AC Dual output A & C connector

PV-USB2-A: Charger only, no interface. For under-dash use. Also available with USB C connector.

### WARRANTY

The PVPro A and C range of chargers are manufactured using rugged components to provide years of service in demanding commercial environments and are covered by a three year return to base guarantee.

# **POWERVERTER PVPWp** 12/24VDC USB CHARGERS IP65 PROTECTED

### SLIMLINE USB POWER WITH ADDED LIQUID & DUST INGRESS PROTECTION TO IP65

The PVPWp range of USB chargers offers all the performance benefits of the PVPro range with additional protection provided to the electronic circuit of the unit. A durable polyurethane compound encompasses the electronic components offering comprehensive protection against dust and liquid ingress to IP65.

This product offers a good solution where tampering might be an issue or in dirty or more challenging environments. Although the nature of the USB connector itself can always be wilfully broken or damaged and will still corrode if repeatedly exposed to liquid ingress, all electronics in these units are protected to IP65.

No airflow is possible between fore and rear of the unit.

Standard USB connector. Note: as the USB connector offers an electrical interface this component can't be protected.

Electronic circuitry. Potting Compound. - All electronics sealed against damage from liquid, dust and impact/vibration, to IP65.

### THE RANGE

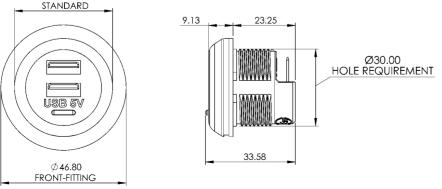

The range mirrors the very successful PVPro products, offering both single and double outputs and rear fit as well as front fitting options which allow the unit to be replaced quickly and easily should this be required. Automatic short circuit protection is also included, so in the event of tampering or compromise, the unit will automatically shut down, then re-start once the fault has been removed. All units can be installed on both 12Vdc or 24Vdc vehicles without adjustment.

Units can be installed directly into bulkheads, vehicle walls, into seat fittings and underneath seats using the mounting pod P/N USB-POD. They can also be fitted onto table tops using the horizontal surface mounting pod P/N USB-TPOD.

Ø36.60

The range has been designed to meet the rigorous standards required for on board commercial vehicle applications including EN50498, ISO7637-2, and is both CE and E marked (Reg10). The casings are made from VO rated (self-extinguishing) high impact polycarbonate and the electronic assembly is predominantly by computer controlled SMT for maximum durability.

- Designed for demanding environments.
- Electronics protected to IP65.
- Approved to EN50498 and ISO7637-2. E marked (Reg10) and CE marked.

### PowerVerter PVPWp-S and PVPWp-D single and double outlets.

The Front facing version can be screwed in place from the front, then covered with the attractive ring to avoid tampering. Available in both single (PVPWp-SFf) and double outputs (PVPWp-DFf).

It is recommended that these units are fused individually with a 1Amp fuse (24V systems) or a 2Amp fuse (12V Systems). Suitable in-line fuses are available;

### WARRANTY

The PVPWp range of chargers are manufactured using rugged components to provide years of service in demanding commercial environments and are covered by a three year return to base guarantee.

Output Power	2.1A (single), 3.0A (double) - max 1.5A per socket
Application	Charges all USB devices including Apple and Android
Transient voltage protection	Meets ISO7637-2 International standard for 12/24V vehicles
Output noise	<50mV pk-pk
Off load current (quiescent current)	<1.7mA
Power conversion efficiency	90%
Isolation	Non-Isolated, >400Vrms only between casing and terminals. For full galvanic isolation, see PV6i-R, PV12-R.
Operating temperature	-25°C to +55°C to meet this specification table
Storage temperature	-25°C to +100°C
Operating humidity	95% max., non-condensing
Casework	Dark grey polycarbonate body, with yellow end cap
Connections	Input: 6.3mm push-in flat blade connectors Output: USB type 'A' single/double socket - tested to 10,000 mating cycles
Output indicator	Blue LED output indication
Mounting method	30mm diameter hole with or without bezel.
Safe area protection: Over Current Over heat Overvoltage and Undervoltage Reverse Polarity Transients Catastrophic protection	Limited by current sensing circuit Limited by temperature sensing circuit Limited by sensing circuit Limited by sensing circuit Protected by filters and rugged component selection Internal fuse
Approvals	2014/30/EU The general EMC directive Regulation 10 The automotive directive 93/68/EEC The CE marking directive
Designed to	EN50498, EN61373, EN50155, EN50121-3-2, EN45545 & ISO 7637-2, AES5 & R118
Markings	CE, UKCA and E marked
IP Rating:	IP65 (Not USB connector). Cleaning: wipe with a damp cloth (do not spray).

Our policy is one of continuous improvement and we reserve the right to change specifications without prior notice.

# **POWERVERTER POLE MOUNTED** 12/24VDC USB POLE CHARGING UNIT

# PASSENGER ACCESSIBLE USB CHARGERS FOR POLE INSTALLATIONS

USB is the preferred method for charging mobile devices on the move. The Alfatronix range of PVPro chargers can already be seen installed on vehicle walls, seat backs and table tops as well as under seats. The PVPm-S USB charger is designed for applications where journeys are relatively short and passengers are standing for some or all of their time on the vehicle. These units are designed for installation onto vertical poles and offer a robust solution for buses, trams, trains and metro carriages.

The units are designed to be fitted directly to 35mm diameter poles and provide an easily accessible and strong charging solution. These chargers utilise the latest fast charge technology and will seek to communicate with the phone and where compatibility exists, will automatically increase the charge voltage. Using this system, it is possible to provide a useful charging boost even over relatively short time periods.

It is recommended that these units are fused individually with a 1Amp fuse (24V systems) or a 2Amp fuse (12V Systems).

### THE RANGE

The PVPm range has been designed to meet the rigorous standards required for on board commercial vehicle applications including EN50498 and ISO7637-2 and is both CE and E marked (Reg10). The casings are made from V0-rated (self-extinguishing) high impact polycarbonate and the PCB is populated by computercontrolled SMT for maximum accuracy and durability.

### Designed for integration into passenger vehicles.

Accepts both 12Vdc and 24Vdc.

- Approved to EN50498 and ISO7637-2. E marked (Reg10) and CE marked.
- Quick Charge enabled.
- 2A internal fuse to protect against catastrophic failure.
- Convenient wide input of 9-32Vdc in one standard casing.
- LED indicates unit operational.
- Robust design allows the unit to be grabbed as part of the pole without damage.
- USB connector faces downwards to protect against splashes and avoid connector damage.

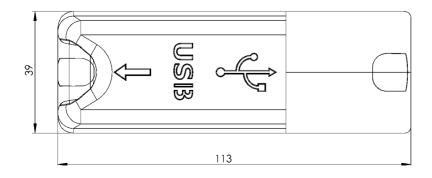

### WARRANTY

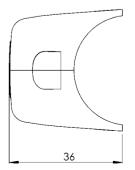

The PVPm Series of Pole mounted USB chargers are manufactured using rugged components to provide years of service in demanding commercial environments and are covered by a three year return to base warranty.

# POLE MOUNTED USB CHARGER

ing unit	113 x 39 x 37mm	57g
TECHNICAL DATA		
_		

Input voltage range	9-32Vdc
Output voltage	5Vdc +/- 0.2V for BC 1.2V and up to 9Vdc for Q.C 3.0
Output power	10W for BC1.2 and 12W for Q.C 3.0
Application	Charges all USB devices Including Apple and Android
Transient voltage protection	Meets ISO7637-2 International standard for 12/24V vehicles and EN61000.4.4 and 4.5
Output noise	<50mV pk-pk
Off load current (quiescent current)	<1.7mA
Power conversion efficiency	90%
Isolation	Non-isolated, >400Vrms only between casing and terminals. For full galvanic isolation, see PV Railway
Operating temperature	-25°C to +55° to meet this specification table
Storage temperature	-25°C to +100°C
Operating humidity	95% max., non-condensing
Casework Dark grey polycarbonate body (R118 + EN45545 materials approved)	
Connections	Input: 6.3mm push-in flat blade connectors Output: USB type 'A' single socket - tested to 10,000 mating cycles
Output indicator	LED indicates unit operational
Mounting method	Screw mounting to vertical pole (Ø35mm)
Protection: Over Current Over heat Overvoltage and Undervoltage Reverse Polarity Transients Catastrophic protection	Limited by current sensing circuit Limited by temperature sensing circuit Limited by sensing circuit Limited by sensing circuit Protected by filters and rugged component selection Internal fuse

# C ICI SERIES DC-DC INTELLIGENT BATTERY CHARGERS

### **DC-DC INTELLIGENT BATTERY CHARGERS**

While many applications can be supplied using a standard voltage converter or stabiliser, sometimes there can be a requirement to charge one DC battery from another in order to provide independent power. The Alfatronix range of DC-DC chargers are based on the very successful PowerVerter range but configured to offer a four stage charging program that will ensure that batteries are charged to a maximum capacity providing long term reliable power.

These products come with many of the same safety and protection features as the PowerVerters, but are also additionally designed to detect faulty batteries and dead cells. They will also ensure that they will not operate unless the source battery is attached to a charging source such as a vehicle alternator or mains unit. In this way, you can ensure that the charger will not allow unintentional draining of the source battery.

### MANY KEY FEATURES

These intelligent battery chargers operate a four stage charging cycle. The first stage monitors the battery to establish that the battery is in good condition before starting the three stage process. This feature is of key importance in ensuring that faulty batteries are not inadvertently charged causing overheating and potential system failure. The units are also reverse polarity protected and when re-connected correctly will operate normally without reset. The Alfatronix three point mounting cradle is also supplied for fast and easy installation.

- These intelligent DC-DC battery chargers offer a comprehensive 4 stage charging programme as well as protection against battery source drainage. A fifth terminal is also available to allow the unit to be installed as a float-mode charger if required as an alternative.
- All the battery chargers are galvanically isolated so can be used on any application including automotive, marine, petrochemical or off road applications.
- DC-DC chargers are suitable for providing auxiliary power on a wide variety of vehicles including fire, police and ambulance, as well as farming, forestry, commercial and leisure marine.

# CHOOSE YOUR BATTERY CHARGER

Part Number	Current	Input Voltage	Power Rating	Dimensions	Weight
ICi24-12 144	12A Isolated	24Vdc input, 12Vdc output (variable charge voltage)	144W	167 x 87 x 50mm	600g
ICi24-24 144	6A Isolated	24Vdc input, 24Vdc output (variable charge voltage)	144W	167 x 87 x 50mm	600g
ICi12-12 072	6A Isolated	12Vdc input, 12Vdc output (variable charge voltage)	72W	167 x 87 x 50mm	600g
ICi12-24 072	3A Isolated	12Vdc input, 24Vdc output (variable charge voltage)	72W	167 x 87 x 50mm	600g

# TECHNICAL DATA

Input voltage range	24-32Vdc, 12-16Vdc. Configured to prevent depletion of source battery.	
Output voltage	12V or 24V nominal through the intelligent battery charging curve. Please see charge graph for further information.	
Transient voltage protection	Meets ISO7637-2 International standard for 24Vdc commercial vehicles	
Electrostatic voltage protection	Meets ISO10605, >8kV contact, 15kV discharge	
Output noise	<50mV pk-pk (100mV on 24V units) at continuous load. Meets CISPR25.	
Off load current (quiescent current)	Typically <5mA. Unit will shut down when source battery is not being charged.	
Power conversion efficiency	Typically 85%	
Isolation	>400Vrms between input , output and case, on isolated products only	
Operating temperature	-25°C to +30°C to meet this specification table +30°C to +80°C de rate linearly to OA	
Storage temperature	-25°C to +100°C	
Operating humidity	95% max., non-condensing	
Casework	Anodised aluminium, glass-filled polycarbonate, dust, water and impact resistance to IP533	
Connections	Five 6.3mm push-on flat blade connectors	
Output indicator	Multicolour LED adjacent to output terminals indicating power and charging mode	
Mounting method	"Click 'n' fit" mounting clip, fitted separately using three hole fixing	
Safe area protection: Over current Over heat Transients Catastrophic failure	Limited by current sensing circuit Limited by temperature sensing circuit Protected by filters and rugged component selection Protected by internal input and output fuses	
Approvals	2014/30/EU The general EMC directive Regulation 10 The automotive directive 93/68/EEC The CE marking directive	
Designed to	EN50498, ISO 7637-2, EN61204-3	
Markings	CE, UKCA and E (automotive) marked	

# **POWERTECTOR** LOW VOLTAGE DISCONNECT

### SOLID STATE BATTERY GUARDS

The PowerTector Battery Guard is a solid state battery device that will monitor the source voltage and disconnect the equipment from the battery if the voltage falls below a pre-determined level. This can work to ensure that there is always sufficient voltage remaining in the battery to start a vehicle engine or ensure power is available for other critical applications. The total discharge of a lead acid battery can also cause damage to the cells significantly shortening the life of the battery. The PowerTector unit can also be set to disconnect equipment at a lower voltage that will still protect the battery from total discharge, while allowing for maximum battery usage. A timed version is also available which will disconnect automatically after a set period of time once the ignition has been switched off.

- All PowerTectors from 40A upwards are mounted in a rugged die cast aluminium casing with glass filled polycarbonate cover providing terminal protection and insulation.
- Smaller unit; The 20A is available in a lightweight, polycarbonate casing that can be simply fitted in the wiring, like an inline fuse without the need to drill the vehicle chassis.

#### A WIDE RANGE OF FEATURES

There are six units in the range from 20A to 200A. The 20A unit offer a simple in-line system, usually wired to a specific piece of equipment. These units do not require chassis mounting and simply connect and tie wrap neatly within the wiring system.

The 40A and 60A units are connected by M6 brass bolts, the 100A and 200A by M10 brass bolts and use a three point mounting system to avoid rocking or stress to the electronics when mounted on uneven surfaces. Heat is dissipated into our custom manufactured die cast casing and all units will operate at full power without additional heatsink dissipation.

### MANUAL SHUTDOWN FACILITY

From 40A upwards, the units have the facility to be manually shutdown either through the ignition or a dedicated switch. In addition, from 100A upwards the units can have an override switch fitted. This allows the units to be reactivated for four minutes to allow emergency actions to be performed.

### ALARM & DISCONNECT DELAY FEATURE

An alarm output is provided which, once the threshold has been reached for 10 seconds, will activate, sounding an alarm or other indicating device for a further 50 seconds prior to disconnection. This allows the operator to restart the engine or take other action to maintain continuous power. (alarm not provided)

### TIMED VERSIONS

In addition to the standard PowerTectors, the PT-T versions offer a timed facility. This will disconnect the output after a set time after the ignition has been turned off. If required, during this time period, the voltage can still be monitored and disconnected if it falls below a set level to protect the battery power and system. The unit will reactivate when the ignition has been turned on again and the battery voltage has reached 8.5Vdc (12V systems), 17Vdc (24V systems).

### FULLY PROGRAMMABLE

All units in the range are supplied pre-programmed for a variety of scenarios offering higher or lower disconnect voltages and it is quick and simple to select the correct programme to suit your needs.

- Using the simple programming terminal, select the pre-set disconnect voltage according to your requirements.
- LED indicates operational status.
- Audible alarm and/or visual indicator can be installed in the dashboard or cockpit to alert operator of a potential problem.
- Switch terminal allows the unit to be operated via the ignition or a manual switch.
- The PowerTector battery guards offer excellent protection for communication and other mission critical applications

# TECHNICAL DATA

Input voltage range	9-32Vdc (Automatic Referencing)
Output voltage	Equal to input voltage when operating (maximum of 100mV drop across terminals)
Transient over current rating	110% for 10s
(% of continuous value)	200% for 1s
	300% for <0.5ms
	On over current shutdown there is a retry every 30s
Quiescent current when shutdown	Typ 2mA @ 13.6V, (PT40/60 Typ 4mA @ 13.6V), (PT100/200 Typ 6mA @ 13.6V)
(while running)	
Transient voltage protection	Meets ISO7637-2 International standard for 24V vehicles
Electrostatic voltage protection	Meets ISO10605, >8kV contact, 15kV discharge
Operating temperature	-25°C to +60°C to meet this specification table
Storage temperature	-25°C to +100°C
Ingress protection	IP65
Casework	Silver anodised aluminium, glass filled polycarbonate
Connections	PT20 Insulated 6.3mm push-on flat blade connectors
	PT40/60 M6 ring tongues
	PT100/200 M10 ring tongues
	6.3mm push-in flat blade connectors for earth, switch, override and alarm
	Programming lead with 2.8mm blade connector provided
Output indicator	Green LED for programming and output indication
Mounting method	PT20 tie wrap to wiring (supplied)
	PT40/60/100/200 3off half inch No8 pozi pan head screws (supplied)
Safe area protection: Over current	Limited by current sensing circuit
Over heat	Limited by temperature sensing circuit
Transients	Protected by filters and rugged component selection
Catastrophic protection	Set by external input fuse (set by application demands) and ground line fuse max 1A
Approvals	2014/30/EU The general EMC directive
	Regulation 10 The automotive directive
	93/68/EEC The CE marking directive
	AES5
Designed to	EN50498, ISO 7637-2
Markings	CE, UKCA and E (automotive) marked

### MAINS POWER SUPPLIES IN 12V, 24V & 48V CONFIGURATIONS

The AD Series units may be used to supply mobile radios and other appliances from AC mains used in offices, portable site cabins, communication cabins, telephone exchanges, remote antennae sites, ships, oil rigs etc. The units will accept either European 230Vac or US 115Vac inputs and are available as standard in 12V, 24V and 48V output configurations. Input is via a standard IEC-320 C13/14 power cord with UK, European or US mains plugs - *please state your requirement*.

AD Series Power supplies can also be fitted with DIN rail clips for rack mounted applications.

### **FAST INSTALLATION**

There's nothing worse than a power supply lying around on the floor. The T-shaped mounting clip, common to many Alfatronix products, allows the power supplies to be installed quickly and simply in many out of the way locations, such as underneath desks or on walls. The 3 point 'T' clip can be fitted securely, even on uneven surfaces, quickly and simply, and then the power supply simply 'clips' in place.

# BATTERY CHARGING REQUIRED?

A fixed voltage battery charging facility is also available with the supplementary loom; P/N AD BB loom.

### FULL CIRCUIT PROTECTION

The AD Series supplies have transient, overload and overheat protection for reliable operation even in the toughest environments.

### RUGGED AND COMPACT

These units, often referred to as 'brick in the lead' supplies are housed in a rugged, corrosion resistant anodised aluminium extrusion. The low mass surface mount technology components offer excellent resistance to shock and vibration, thus further increasing the reliability of these products.

A green LED indicates when there is output from the converter. This gives reassurance to the installation engineer and speeds fault finding.

### DESKTOP VERSIONS ALSO AVAILABLE

While the brick power supplies offer a versatile solution, if you are powering a mobile radio, try our *Desktop Versions*. These are configured to attach to the radio forming one dedicated unit and are available for a variety of radios including Motorola, Hytera, Tait, Kenwood, Icom, Maxon and Vertex.

### **PRODUCT CODING**

The product code is derived as follows, taking the AD 115/230-12 108 as an example:

AD	AC input and DC output
115/230Denotes auto select US European AC input volta	
-12	Nominal 12Vdc output
108	108W capacity unit

# **AD SERIES** DESKTOP POWER SUPPLIES

### **DESKTOP POWER SUPPLIES**

The desktop power supplies, popularly called the "wedge" due to its distinctive, ergonomically friendly shape, offer a convenient way to convert 12Vdc mobile radio transceivers for use as desktop base stations. They will operate from AC supplies, either 115V or 230V without manual adjustment and output of 12Vdc at 9Amps.

- We started making these for Motorola radios in 2002, now we have 27 varieties for 11 manufacturers.
- The desktop units are supplied with end-plates configured to fit with your radio see complete list.
- For a complete system, order our fully compatible battery back up box P/N AD BBB (to include a 7Ah battery) or AD BBB NB (excluding the battery).

### **BATTERY BACK UP BOX**

The AD Series Desktop Power Supplies include a battery back up output as standard. This can be connected to maintain charge in a lead acid battery to supply power in the event of a mains failure. As a neat alternative to a loose battery, Alfatronix also supply a battery back up box, *P/N AD BBB*. This is designed to fit underneath the desktop supply and radio assembly and includes a 7Ah lead acid gel battery, presenting all three components as one tidy desktop assembly.

The battery back up box also includes a speaker (mounted on the front of the unit) for those wishing to use hands free radio operation.

### CAN'T FIND WHAT YOU'RE LOOKING FOR?

Alfatronix Desktop "wedge" power supplies are configured to suit a wide range of radio transceivers from many manufacturers. However, if you use a variety of radio not listed, or cannot find a compatible unit, try our UNIVERSAL unit (P/N AD UN UNI). This uses a mechanical interlocking fixing system ("hook and loop") to fix the transceiver securely to the power supply.

### **PRODUCT CODING**

The product codes are developed to be as intuitive as possible. Taking the Motorola AD MT CM as an example:

AD	AC input & DC output
МТ	Denotes the radio manufacturer, in this case Motorola
СМ	Denotes a popular radio compatible with this unit

Please note: Like most part numbers, the CM fits a *range* of radios, not just the CM.

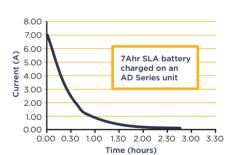

Radio Transceiver + Alfatronix Desktop Power Supply + Alfatronix Battery Back Jp Box

The Alfatronix range of Desktop Power Supplies provide bespoke solutions for radios from a wide range of manufacturers. For any not listed the *AD UNI version* can be used with any radio.

### HARSH ENVIRONMENTS

These products offer the same great electrical characteristics as our PowerVerter and DD Series, but are provided in "Ruggedised" casings for use in harsh environments. using the well-known Ingress Protection System, the product range has been tested and subjected to demanding environmental conditions and awarded a rating of IP65. All Ruggesdised PowerVerters are enclosed in a durable aluminium extrusion. The low mass Surface Mount Technology components are also less prone to damage from vibration and shock, further increasing the reliability of the units.

### INNOVATIVE TECHNOLOGY

Utilising the same GORE-TEX® technology that is used in extreme outdoor clothing, the Ruggedised range is able to breathe freely, without compromising the water tight and dust tight seal. This free-flow of air ensures that the pressure remains equal inside and outside the unit thus allowing it to operate within a large temperature range and at varying altitudes safely.

### **FAST INSTALLATION**

All the products fit onto a "Click 'n' Fit" mounting clip which is fixed in three points allowing it to be mounted on uneven surfaces. It is easy to fit the clip into awkward places, then simply click the unit into position.

### **ANTI-VIBRATION**

As well as being dust and water tight to IP65, the units are vibration resistant. They have an anti-vibration cable gland fitted into a hexagonal recess to prevent unwanted knocks from loosening it, so they can be fitted into rugged environments care-free.

### **ADDITIONAL FEATURES**

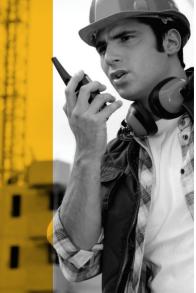

The RU range has the same features as the standard PV & DD range, but in addition, they also offer the following benefits:

- Dust, water and impact resistant to IP65.
- Breathable vent to prevent unwanted build up of pressure.
- Anti-vibration cable gland.
- Supplied with 1m of cable as standard.

### **PRODUCT VARIANTS**

Many PowerVerter-RU and DD-RU Series products can be configured with alternative output voltages etc. for specialist applications. Please call our sales team to discuss your requirements.

# CHOOSE YOUR RU SERIES PRODUCT

Part Number	Cont/Int Current	Nominal Voltage	Power Rating	Dimensions	Weight
PV3s-RU	3A/6A non-isolated	24Vdc input, 12Vdc output	36W	86 x 91 x 52mm	325g
PV6s-RU	6A/10A non-isolated	24Vdc input, 12Vdc output	72W	108 x 91 x 52mm	370g
PV12s-RU	12A/18A non-isolated	24Vdc input, 12Vdc output	144W	146 x 91 x 52mm	505g
*PV18s-RU	18A/21A non-isolated	24Vdc input, 12Vdc output	216W	186 x 91 x 52mm	820g
*PV24s-RU	24A/30A non-isolated	24Vdc input, 12Vdc output	288W	186 x 91 x 52mm	835g
**PV50s-RU	50A/60A non-isolated	24Vdc input, 12Vdc output	600W	274 x 125 x 74mm	2340g
PV3i-RU	3A/6A isolated	24Vdc input, 12Vdc output	36W	108 x 91 x 52mm	390g
PV6i-RU	6A/10A isolated	24Vdc input, 12Vdc output	72W	146 x 91 x 52mm	510g
PV12i-RU	12A/18A isolated	24Vdc input, 12Vdc output	144W	186 x 91 x 52mm	690g
PV18i-RU	18A/22A isolated	24Vdc input, 12Vdc output	216W	236 x 91 x 52mm	1035g
PV24i-RU	24A/30A isolated	24Vdc input, 12Vdc output	288W	236 x 91 x 52mm	1050g
DDi 12-12 036-RU	3A/4A isolated	12Vdc input, 12Vdc output	36W	108 x 91 x 52mm	390g
DDi 12-12 072-RU	6A/8A isolated	12Vdc input, 12Vdc output	72W	146 x 91 x 52mm	505g
DDi 12-12 108-RU	9A/11A isolated	12Vdc input, 12Vdc output	108W	186 x 91 x 52mm	835g
DDi 24-24 072-RU	3A/4A isolated	24Vdc input, 24Vdc output	72W	146 x 91 x 52mm	540g
DDi 24-24 108-RU	4.5A/6A isolated	24Vdc input, 24Vdc output	108W	186 x 91 x 52mm	640g
DDi 24-24 168-RU	7A/9A isolated	24Vdc input, 24Vdc output	168W	236 x 91 x 52mm	880g
DD 12-24 072-RU	3A/3.75A non-isolated	12Vdc input, 24Vdc output	72W	108 x 91 x 52mm	400g
*DD 12-24 168-RU	7A/9A non-isolated	12Vdc input, 24Vdc output	168W	186 x 91 x 52mm	740g
*DD 12-24 240-RU	10A/13A non-isolated	12Vdc input, 24Vdc output	240W	236 x 91 x 52mm	920g
**DD 12-24 400-RU	17A/22A non-isolated	12Vdc input, 24Vdc output	408W	221 x 125 x 74mm	2080g
**DD 12-24 600-RU	25A/30A non-isolated	12Vdc input, 24Vdc output	600W	274 x 125 x 74mm	2340g
DD 48-12 072-RU	6A/8A non-isolated	48Vdc input, 12Vdc output	72W	108 x 91 x 52mm	360g
DD 48-12 108-RU	9A/11A non-isolated	48Vdc input, 12Vdc output	108W	146 x 91 x 52mm	460g
DDi 48-12 036-RU	3A/6A isolated	48Vdc input, 12Vdc output	36W	108 x 91 x 52mm	390g
DDi 48-12 072-RU	6A/8A isolated	48Vdc input, 12Vdc output	72W	146 x 91 x 52mm	510g
Oth	er input and output voltage co	nfigurations are also available as spe	ecial orders, please a	sk our sales team	

# TECHNICAL DATA

Input voltage range	12Vdc, 24Vdc +/- 30%, 48Vdc -30% +25%		
Output voltage	13.6Vdc or 27.2Vdc +15% -20% at extremes of temperature, load, input tolerance etc.		
Intermittent output power	Continuous rating +25%, taken for maximum of 2 minutes followed by 8 minutes rest		
Transient voltage protection	Meets ISO7637-2 International standard for 24Vdc commercial vehicles		
Electrostatic voltage protection	Meets ISO10605, ISO14982, >8kV contact, 15kV discharge		
Output noise	<50mV pk-pk (100mV on 24V units) at continuous load. Meets CISPR25 and VDE0879-3		
Off load current (quiescent current)	<15mA (PowerVerter), <15mA (DD Series exc. 12-24), <100mA (DD Series 12-24 units)		
Power conversion efficiency	Typically: 90% for non-isolated units, 85% for isolated units ** 95%		
Isolation	>400Vrms between input, output and case, on isolated products only		
Operating temperature	-25°C to +30°C de rate output current linearly from +30°C to 0A at +80°C		
Storage temperature	-25°C to +100°C		
Operating humidity	100%		
Casework	Anodised aluminium, glass filled polycarbonate, dust water and impact resistance to IP65		
Connections	4 core cable, *4 wires (1m in length) stripped and tinned for individual connection		
Voltage drop in 1m supplied cable	60mV per amp @ 25°C on units with output current < 18A		
	10mV per amp @ 25°C on units with output current $\ge$ 18A		
Output indicator	Green LED adjacent to cable gland		
Mounting method	Click 'n' fit mounting clip, fitted separately using three hole fixture **4 hole cradle		
Safe area protection: Over current	Limited by current sensing circuit		
Over heat	Limited by temperature sensing circuit		
Transients	Protected by filters and rugged component selection		
Catastrophic protection	Protected by internal input and output fuses		
Approvals	2014/30/EU The general EMC directive		
	Regulation 10 The automotive directive		
	93/68/EEC The CE marking directive		
Markings	CE, UKCA and E (automotive) marked		

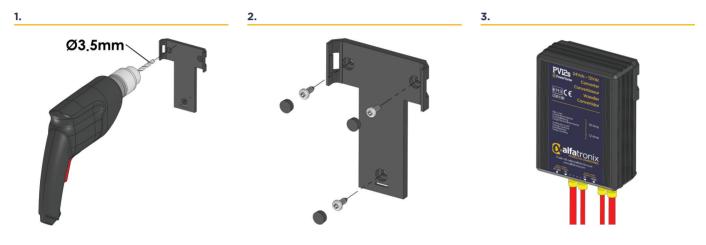

Our policy is one of continuous improvement and we reserve the right to change specifications without prior notice.

# **ALFATRONIX** MOUNTING METHODS

### 'T' SHAPED MOUNTING CRADLE

Many Alfatronix products are installed using our 'T' shaped mounting cradle. This is manufactured from VO rated (self-extinguishing) glass filled polycarbonate material and exhibits excellent strength and durability characteristics. The three point design allows for flat installation, even on uneven surfaces and it is both quick and easy to install as the bracket itself can be used as a template for accurate drilling before being screwed firmly into position. The converter can be fully wired before being clipped securely onto the bracket. The clip design is entirely vibration proof and, as the body of the converter covers the screw heads, once installed it is virtually impossible for any of the screws to vibrate loose, a potential long term problem on a diesel vehicle.

This bracket is supplied as standard with all PowerVerter DC-DC converters up to 240W (24A), DD Series converters (up to 240W) and Brick in the lead AD Series mains power supplies.

### **DIN RAIL MOUNTING CLIP**

The din rail mounting pack is sold separately as an alternative to the 'T' shaped bracket and is supplied in a pack of two. Please order part number: DIN RAIL CLIP Pack (2). These are compatible with all units supplied with a 'T' bracket (which should be discarded). For PV3s units, only one clip is sufficient. A pair of clips should be used for all other installations.

### **POWERTECTOR INSTALLATION METHODS**

Depending on the size of the units, the PowerTector battery guards use two different mounting methods.

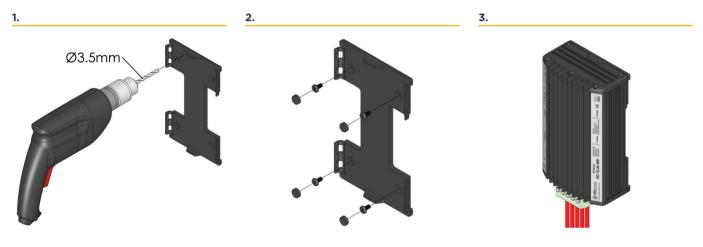

For any units up to 20A, it is not necessary to drill into the vehicle chassis as these small, lightweight units can be wired in place, then simply tie-wrapped in position in a similar way as an in line fuse.

# **ALFATRONIX** MOUNTING METHODS

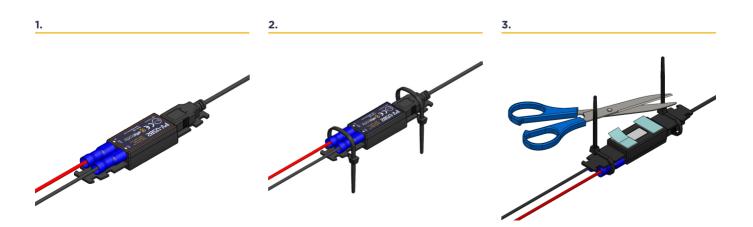

### **'I' SHAPED MOUNTING CRADLE**

This cradle is supplied as standard and used for the more powerful, heavier units from 400W upwards. Examples include DD 12-24 400, DD 12-24 600 and PV50s. It is manufactured from VO rated (self-extinguishing) glass filled polycarbonate material and exhibits excellent strength and durability characteristics. The four point design includes spacer washers to allow for flat installation, even on uneven surfaces and it is both quick and easy to install as the bracket itself can be used as a template for accurate drilling before being screwed firmly in position. The converter can be fully wired before being clipped securely onto the bracket. The clip design is entirely vibration proof and as the body of the converter covers the screw heads, once installed it is virtually impossible for any of the screws to vibrate loose, a potential long term problem on a diesel vehicle.

### **PV-USB2 INSTALLATION METHODS**

To install the PV-USB2, it is not necessary to drill into the vehicle chassis as these small, lightweight units can be wired in place, then simply tie-wrapped in position in a similar way as an in line fuse.

### **PVPro & PV65R INSTALLATION METHODS**

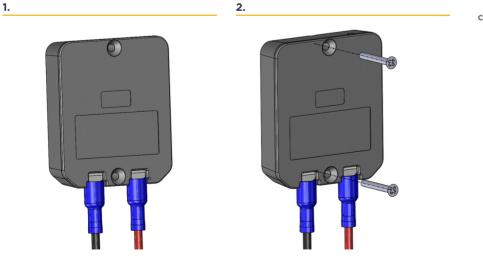

Choose a suitable mounting surface ensuring nothing behind can be damaged, then drill a Ø30mm hole. For Standard Ring installation press 'Standard Ring' over front of PVPro, ensuring the slot is at the bottom. Insert body through the hole. Tighten the nut onto back of body ensuring front is aligned. For Front fitting place bezel over PVPro/PV65R, mark screw hole positions, install through Ø30mm hole and screw into position. Press 'Bezel Ring' over front of PVPro, ensuring the slot is at the bottom.

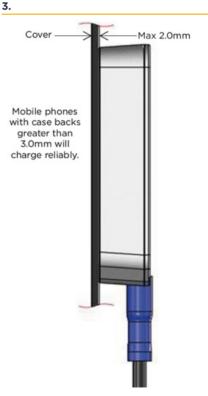

### INTEGRATED WIRELESS CHARGER INSTALLATION

Crimp cables on to blade terminals and plug onto unit. Using screws provided secure the device in desired location. (No.6  $\times$  25 provided)

Ensure there is no more than 2mm of material in front of the unit. A distance of greater than 5mm from the front of the unit will stop the unit from detecting a phone. Connect to compatible power source (9V-32V, fused at 2A) and ensure blue light is on to check unit is working

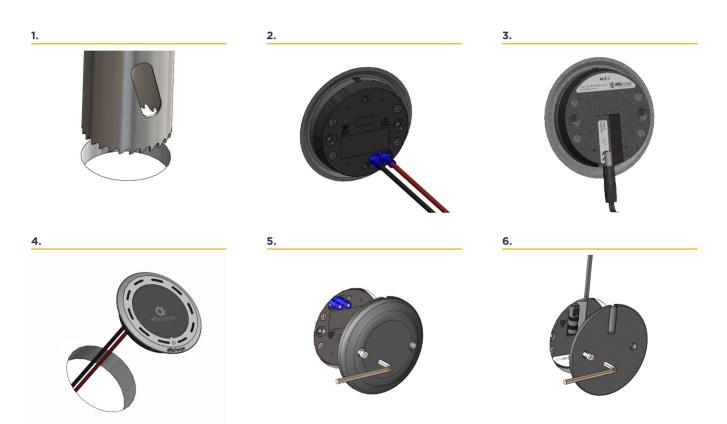

### WIRELESS CHARGER INSTALLATION

Use an 80mm hole to saw to cut hole in work surface—minimum table thickness 19.5mm. Crimp cables onto blade terminals or connect power supply

Place unit and cables through previously cut hole

Measure the thickness of work surface and choose correct size screw, using a 3mm hex key, lightly tighten the retaining plate to the underside of the work surface to secure the unit (DO NOT OVERTIGHTEN). Ensure the cable is trapped in the correct location.

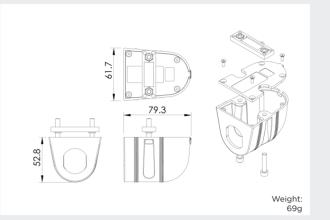

### USB-POD

#### FOR UNDERSEAT INSTALLATIONS

Rugged mounting pod for PVPro USB installation under seats, accessible from the front or rear. It can house PVPro, PV65R and PVPWp USB chargers and is also available as a complete assembly together with 1.2m of fused wiring.

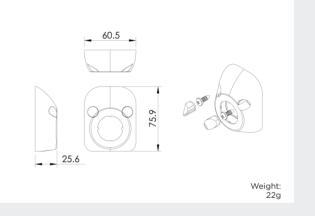

### **USB-WPOD**

FOR ON WALL INSTALLATIONS

Wall-mounted housing to allow the standard PVPro & PVPWp range to be installed on the wall of the vehicle without the need of a 30mm drilled hole. It is fixed to the wall with screws hidden by tamper-proof overs and space is provided for a fuse to protect the wiring (recommended).

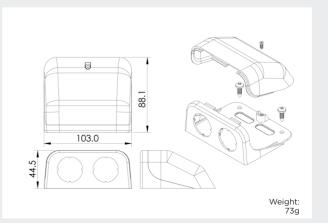

### **USB-TPOD**

#### FOR TABLE TOP INSTALLATIONS

Designed to house two PVPro, PV65R or PVPWp USB chargers. It comes complete with fused internal wiring to allow for a single input source from the vehicle wiring. Using this system up to four USB outlets (2 x double units) can be made available for charging at tables.
